-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2652

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, on line 2, "the arm" has no antecedent basis.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 9 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by ULTICAN et al (2002/0075593).

Note figure 3. ULTICAN et al shows a slider for use in a disk drive, the slider mounting read and write heads (29,31) which are surrounded by protrusion pads (80 – each longitudinal leg of the U-shape structure is read as a pad). The pads are of a soft material that wears away (see par 0009 lines 10-14).

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2652

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 10, 12, and 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over ULTICAN et al (2002/0075593).

ULTICAN et al shows a slider substantially as claimed. ULTICAN et al differs in not: (A) specifying an exact spacing for the pads (re claim 10), (B) specifying an exact number of pads (re claim 12), and (C) the listed environmental disk drive features (re claims 15-17).

Concerning (A) and (B), it would have been obvious to one of ordinary skill in the art at the time the invention was made to configure the spacing and number of pads as listed in these claims. The motivation is as follows: ULTICAN et al states that the exact sizing and number of pads can be varied (see par. 0011).

Concerning (C), it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the listed environmental features in the disk drive of ULTICAN et al. The motivation is as follows: these are well known and commonly used environmental features, ULTICAN et al simply did not discuss specifics of the disk drive environment. One of ordinary skill in the art would utilize any such known features where none were specified.

7. Claims 13 and 14 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claim 4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These are commonly owned patents of interest.
